CAPABILITY STATEMENT

GeoKnight Geospatial Information Services

Fast, AI-driven real-world accuracy at a fraction of the cost

GeoKnight GIS is a Jacksonville, Florida geospatial consultancy providing county-wide address data QC and spatial data services. Rule-driven checks plus AI-assisted review, with every change logged and approved by a human.

Core competencies

- Address and parcel data QC audits (duplicates, gaps, geometry errors, range conflicts)
- Spatial data repair with logged, reviewable fixes, including deed/COGO checks
- Utility network topology QC and tracing
- Property and FEMA flood-risk data integration in PostGIS
- Data pipelines and open-data publishing (ArcGIS REST, Census, dbt, DuckDB, PMTiles)
- AI agent access to GIS data through read-only, tested MCP servers

Differentiators

- AI-assisted review combined with rule-driven, auditable checks
- Source data is never overwritten; every change is logged
- A human approves each fix; nothing is applied silently
- Works with ArcGIS data and open-source tools (PostGIS, QGIS, DuckDB)
- Local LLM option so data can stay on your own machines
- Founder-led: former GS-13 Geographer (U.S. Army Geospatial Center), 23+ years building and validating authoritative spatial data
